PROJECTS

Institute Management System

Sep '24 — Jan '25
pune

- A comprehensive institution management system built using Java Spring Boot, React.js, and MySQL to handle courses, student records, and faculty details efficiently. Features include user authentication and role-based access.
- It helps manage student records, admissions, attendance, fees, staff details, courses, and communication.

Library-Management-System-with-Security

Dec '24 — Jan '25

- The Library Management System is a secure web app with RBAC. Admins manage books using CRUD operations, while users can view and borrow books. Users track their borrowing history via JWT tokens, and admins see all borrowed books with return status. Redux handles state management for borrowing and returning books.
